

### Wireless Remote controls

Image	Parameter
	<p>Power voltage:DC6V (CR1620 3V * 2PCS)            Quiescent current: ≤0uA            Working current: ≤10mA            Working frequency: 433.92Mhz            Working indicator: Blue LED            Buttons: 4 PCS            Type of encoding: learning code (EV1527)            Modulation mode: ASK (AM)            Radiation power:≤10mw            Emission distance(in the open area): about 80 m            (the receiving sensitivity -100dbm)            Working temperature: -20℃-+70℃            Working range: use for all types of home,            commercial, remote control, industry automation            control, and all kinds of receiving control that's via            frequency 433Mhz control area,etc.</p>
